EDUCATION

Wayne State University

Bachelor of Science in Computer Science

Detroit, MI

Graduated, Dec 2025

- GPA: 3.94/4.0
- Courses: Data Structures and Algorithms, Computer Organization, Programming Languages, Computer Security, Software Engineering, Web Systems, User Interface, Operating System, App Development for Entrepreneurs, Embedded Systems, Machine Learning, Deep Learning, Intro to AI.

EXPERIENCE

Wade Trim – Intern - [Company Website](#)

Software Developer

Detroit, MI

March 2026-Present

- Developed an AI-powered SharePoint document chatbot using Microsoft Copilot Studio, Visual Studio Code, and Microsoft Azure to provide employees with SOPs, FAQs, and internal documentation access through secure role-based responses.
- Implemented and tested HTTP authentication workflows and API endpoints that verified Azure Object IDs to determine user roles (Admin, Developer, Non-Admin) and dynamically control chatbot behavior and permissions.
- Contributed to an internal Consumers Energy project tracker by building automated notification systems and SharePoint-integrated frontend components using TypeScript, React, Tailwind CSS, and Node.js to manage project status reporting for supervisors, designers, and QC teams.

BoomerRoomers - [Company Website](#)

Software Engineer

New York, NY

Dec 2025-Mar 2026

- Integrated the Certn background check API into the platform to support secure user verification and streamline the tenant screening process for property-related services.
- Redesigned and optimized the user signup workflow by improving onboarding questions and personalization logic, reducing friction for new users and helping them access relevant property listings more efficiently.
- Collaborated on frontend and backend feature improvements to enhance usability, onboarding flow, and overall user experience for a remote property-search platform.

SMOOTH INVESTMENT – WAYNE STATE UNIVERSITY - [Website](#)

Senior Capstone

Detroit, MI

Sep 2025-Dec 2025

- Led a 4-member team to design and build Smooth Investment, an AI-powered stock analysis platform using React/TypeScript, Flask, and PostgreSQL. Integrated yfinance for market data, Finnhub for IPO information, and developed tools for IPO comparison using Euclidean algorithm to analyze volume and fundamentals.
- Built evaluation systems that assess a company's profitability, revenue, debt, and margins to generate investment-readiness scores, implemented an AI chatbot using Gemini LLM to answer finance-related questions, and added crypto insights page for users to analyze cryptocurrency performance and trends.
- Developed secure REST APIs, managed a PostgreSQL/Neon database, and implemented a universal LSTM supporting the AI backend.

IMAGE DENOISING – WAYNE STATE UNIVERSITY - [GitHub](#)

Deep Learning Engineer

Detroit, MI

Jan 2025-May 2025

- Built and trained a U-Net convolutional neural network in PyTorch for image denoising using the DIV2K high-resolution dataset, generating noisy-clean image pairs with progressively reduced Gaussian noise through curriculum-style training to improve learning stability and performance.
- Implemented a hybrid loss function combining MSE and SSIM for perceptual quality optimization, achieving clear visual reconstruction and robust generalization; automated model saving, validation, and inference to produce denoised outputs from unseen images.

SKILLS

- **Experienced:** Python, C, C++, Java, Swift, TypeScript, JavaScript, SQL, HTML, CSS, REST APIs, Flask, Jinja2, Go, React, Vue, GCC, GDB, Vim, Cron, Networking, NodeJS
- **Software & Tools:** Docker, Linux, Git, Visual Studio, VS Code, Xcode, Unity, Arduino, Render, Vercel, Neon, AWS Cloud, PostgreSQL, Ansible, RabbitMQ, Azure
- **Implemented:** Computer Vision, Machine Learning, Postfix Calculator, Euchre, Backtracking Puzzle, Graph Search Algorithms, AVL Tree, Priority Queues, Pairing Heap, MapReduce
